

Elation Health and Aledade: Better Together.

Elevate your practice's performance with Elation Health and Aledade.

Health care in the U.S. is rapidly transitioning to a system based on value rather than volume, with overwhelmingly positive results for private primary care practices. Value-based care delivers improved outcomes and reduced costs for patients, as well as long-term sustainability for primary care practices through physician-led Accountable Care Organizations (ACOs).

Aledade, a best-in-class ACO company with a proven track record of delivering long-term financial success to its member practices, is partnering with Elation Health to deliver access to Aledade's cutting-edge population health solution. Aledade will integrate seamlessly with your Elation EHR, enabling your practice to further streamline population health workflows and uncover missed revenue opportunities.

This is a time-sensitive offer for your practice.

California independent primary care practices that meet the Aug. 4, 2022, Medicare deadline to enroll in an Aledade ACO for the 2023 performance year will be eligible for up to \$20,000 in up-front payments in the first year as part of the on-boarding process with Aledade. Eligible practices will also agree to sign up for Aledade's value-based contracts with commercial payers where available.

By joining an Aledade ACO, your practice could also:

- Increase fee-for-service revenues up to 13%*
- Earn Medicare Shared Savings Program revenues, at an average of \$198,000** per practice
- Overcome staffing shortages with local support from Aledade's workflow experts
- Unlock access to actionable patient data from across the care spectrum in a single platform
- Reduce administrative burdens with timely patient care alerts and efficient workflow tools

Act now.
